¹ ACS math scores or a mathematics placement exam is needed to inform whether a student should begin directly in calculus or a different math class.

² These are standard Dragon Core courses, but others can be taken in their place.

³ Physics 200/201 should not be taken before calculus. Physics 160/161 can be used instead of Physics 200/201.

⁴ When research gets taken is very flexible.

⁵ Physical Chemistry I is offered every fall, but Physical Chemistry II is only offered during the spring of even-numbered years.

⁶ Biochemistry II is not required but is frequently taken as an elective during the spring semester of the year in which Biochem I is taken.

⁷ Analytical Chemistry II is only offered during the fall of odd-numbered years.

⁸ Inorganic Chemistry II is only offered during the spring of odd-numbered years. In a given year, one or the other but not both of PChem II and Inorganic II are offered.
