Biography

Russ Colson is a scientist, teacher, author, and gardener living in northwest Minnesota, far enough from city lights to see the Milky Way and the Aurora Borealis. He writes contemplative adventure science fiction with an emphasis on character relationships and science as discovery. He is a professor at Minnesota State University Moorhead, a former national professor of the year, author of the science fiction novel *The Arasmith Certainty Principle* (Chanticleer International Book Award 1st Place Category Winner, Double Dragon Publishing, 2018), and coauthor of the science education book *Learning to Read the Earth and Sky* (NSTA Press, 2016). He has written several short stories published in *Worlds of Wonder*, *Neo-Opis Science Fiction Magazine*, *Interzone*, *Stupefying Stories*, and others. He previously worked at the Johnson Space Center in Texas and at Washington University in St. Louis where, among other things, he studied how a lunar colony might mine oxygen from the local rock. More about his writing can be found at russcolson.com.

Fiction Books

The Arasmith Certainty Principle, Double Dragon Publishing, Oct 17, 2018--Chanticleer International Book Award 1st Place Category Winner
