

Math 310
Extra Credit 2

Due: Saturday, November 10th

Sign up for the MAA-NCS Team Problem Solving Competition. Teams can contain at most 3 students. The Competition Examination has 10 questions each worth 10 points, so scores will be out of 100 points. Students from Math 310 who compete will receive 1/10th their score (rounded up) on the exam as Extra Credit points toward their final grade [you will also receive extra credit 1 point simply for attending and attempting the exam].

I will announce the specific meeting time and location for the exam in the near future (rooms have not yet been scheduled), but the exam will be held during the morning of November 12th on campus.

Problems from past exams can be found at the following website:
