

# Math 487

## Presentation Summary and Review

**Instructions:** Type your responses to each of the following questions on a separate piece of paper. This assignment is worth 10 points toward your project grade.

1. Give the title of the presentation you are summarizing and reviewing. Also list the students who gave the presentation.
2. Give a summary of the content that was covered during the presentation. Which parts did you find most interesting?
3. Give a short critique of the oral component of the presentation. Was it delivered effectively? Was the content appropriate for the intended audience? Was the talk well organized and did it use the time effectively?
4. Give a short critique of the slides, handouts, and/or other visual and technological components of the presentation. Did these aspects of the presentation make the talk more understandable?
5. List at least one thing from the presentation that you learned that you did not know beforehand. Also list at least one thing about the presentation that could be improved were this presentation to be given again in the future.
