

Math 491 - Mathematical Writing
Journal Assignment #1
Due: By 4:00pm on Wednesday, January 23rd

Instructions: Carefully read through Article #1: “Mixing a Night out with Probability” (which you received in class on Friday). Then write a short journal (1 - 2 pages) which addresses each of the questions posed below. Rather than addressing the listed questions directly one at a time, try to address them less directly through a more general discussion of the overall quality and effectiveness of this article.

- How would you describe the main purpose of this article?
- Who is the (primary) intended audience of this article?
- What mathematical content knowledge is necessary in order to understand this article?
- Is the title well chosen?
- Do the first few paragraphs do a good job getting the attention of the reader? Why or why not?
- Is the article clearly written and easy to follow?
- Did you find this article to be interesting? Did you find it to be engaging and entertaining?
- Is the article’s mathematical notation accurate and are the figures helpful and effective?
- What did you like best about this article?
- What is one thing about the paper that could be clarified or improved?
