

Math 491 - Mathematical Writing  
Writing Assignment #7  
Due: By 4:00pm on Wednesday, March 13th

**Instructions:**

You are expected to write a short (~ 2-page) polished paper on a mathematical topic (it can be simpler than the content from the article you read for Assignments #5 and #6). For example, you could select a theorem and write about its proof, or you could write about a topic that would be considered background material for one of our previous articles. You should concentrate on giving a clear exposition of your chosen topic. You should also focus on incorporating mathematical symbols into the text of your paper. Your topic must be at the Calculus level (or higher).

Grades will be based primarily on the quality of your exposition and how well you incorporate mathematical symbolic content into your paper.

This assignment is due **by 4:00pm on Wednesday, March 13th.**
