

Math 491 - Mathematical Writing
Writing Assignment #8
Due: By 4:00pm on Friday, March 22nd

Instructions: You will read an article on a topic that you are considering for your final paper. You will write a 2-3 page paper consisting of two parts.

- The first part will be a summary of the content of the article. In this part there is to be no commentary or editorial remarks. It should be a clear, polished, well-written synopsis of the content of the article (think about what you did on Assignment #6 for this part).
- For the second part, you will write about your thoughts on your chosen topic. You should explore any questions you have or problems that arise from your selected article that you might want to investigate further. You will also be expected to connect the content in the article to the larger context of mathematics.

Grades will be based on how well you summarize the content of your selected article and how completely you explore your own thoughts about and directions for potential further investigation into the topic of the article.

This assignment is due **by 4:00pm on Friday, March 22nd.**
