

## Enrolling Early in Sapling

1. Sapling online homework is operated by an external company
2. They don't allow normal enrollment more than two weeks in advance of the "official" start.
3. In order to start Sapling more than two weeks in advance, do the following:
  - a. Go to Sapling and create an account (but don't actually try to register for a course.)
    - <http://www2.saplinglearning.com/help/higher-education-us/accounts-and-registration>
    - When you do that, remember which email address you've entered! 😊
  - b. Email me
  - c. I will then send your Sapling email to Sapling to open my class for you to register.
    - I will need to send them your email address.
  - d. You will be email-contacted, after which you can actually register for my course
    - You will need to pay, of course!
