

Possible/Suggested 10-week Schedule (you can personalize it, and start it earlier or later):

- Geared to be non-rushed, but to get everything done one week before the August 1 deadline, and give some July and August free!
- Note: It's really easy to have a plan but then to fall behind. It is wise to plan to complete all the work a week early. That provides a little bit of cushion, for cases when you realize you'll need to spend some extra time on a test. (Especially for the last test, which is typically the hardest.)
- This is **my favorite, recommended schedule** if you only want to complete Organic I!
- **This should involve about 6 lectures per week.**

Suggested ~11-week Schedule: For students in the Full-term May 15-August 1 Section who want to complete Organic I (but not also Organic II during the same summer)

Notes on the 11-week schedule:

- On this schedule you might routinely be going through one lecture video (hour-long) per day, plus reviewing them and doing ACHIEVE/SAPLING homework. Complete those far-enough in advance of test days so as to give yourself time to put everything together in advance of a test.
- The lecture videos will be available by Feb 14. So you could start early if you wished.
- **The actual official end-of-semester drop-dead completion deadline is Friday August 1, 2025.**
