

MSUM Library

honors the 2008 tenure and promotion of

George Holley

Anthropology &

Earth Science

Nowotny, Karl Anton. *Tlacuilolli*. University of Oklahoma Press, 2005

**Associate Professor Holley chose this book because:**

Pre-conquest books of the Central Highlands are unfortunately an arcane field. Their neglect is in part due to the difficulty in reading the symbolic renderings for their stories, mantic scenes, and calendric calculations. Karl Nowotny produced an important book on a portion of these texts that was printed in German. This recent translation into English of his research allows scholars of the New World to hear another voice in this fascinating and continual changing perspective of the past.
