

MSUM Library

honors the 2009 promotion of

Dr. Bruce Roberts

Anthropology / Earth Science

Baer, Hans, Merrill Singer and Ida Susser. *Medical Anthropology and the World System 2nd ed.* Praeger, 2004

Professor Roberts chose this book because:

Inequality of access to health care and the differential distribution of disease are two of the biggest challenges of the 21st century. Only by examining these issues in their social, political, and historical contexts can we understand the true reasons for such disparities. Critical medical anthropology, which is the type of interdisciplinary research which profited in this book, holds enormous potential for engaging these issues.
