

MSUM Library

honors the 2009 promotion of

Dr. Nancy Paul

Speech/Language/Hearing
Sciences

Chapey, Roberta, ed. *Language Intervention Strategies in Aphasia and Related Neurogenic Communication Disorders*, 5th ed. Lippincott Williams & Williams, 2008

Associate Professor Paul chose this book because:

This is a wonderful resource for both students and practicing clinicians. Many top experts contributed content and a wide variety of viewpoints are represented. I especially like the attention given to the social model of intervention which addresses not just a person with a speech and language disorder but also the surrounding environment which can have a tremendous effect on success as a communicator.
