MSUM FILM STUDIES PROF RELEASES FEATURE FILM FOR NATIONAL DISTRIBUTION

“Cold Harbor,” the award-winning feature film by MSUM Film Studies professor Tom Brandau, is slated for national distribution on March 27. The feature, which recently ended a successful two-year festival run, is being distributed by Alpha Video as part of its New Cinema series.

The “Cold Harbor” DVD release includes a number of added bonus features including: a commentary track by Brandau and producer Mark Redfield, a

“making of” piece featuring interviews with key production crew members, two additional short films written and directed by Brandau, and a music video for the opening credits song “Playing It Dead,” written and performed by

March 26 2007. Produced by the Publications Office. tornell@mnstate.edu (Deadline 10 a.m. Friday)

Twin Cities musician Mike Lane.

The music video was produced here at MSUM several weeks ago to help promote the DVD release of the film. The production crew (made up of both current Film Studies students and recent graduates) included: Kak Lee (cinematographer), Jason Bedard (gaffer), Mike Stromenger (assistant director), Ryan Sailer (grip), Cody Redmer (jib-arm grip) and Tom Brandau (director).

The story line: When an old man ends his life by throwing himself into the icy winter surf near his seaside home, his four estranged sons are left to deal with their memories, feelings of loss and betrayal, and unsettled family issues. As they pick through and pack up his belongings, they discover the missing puzzle pieces of their own lives, gradually recognizing themselves and each other in the remnants of their father’s life.

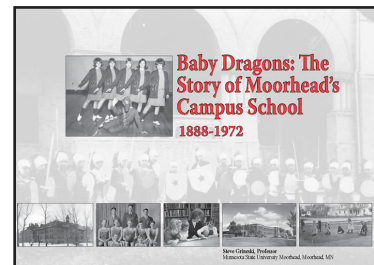

As described by Oldies.com: Starring Mark Redfield (“The Death of Poe,” “Dr. Jekyll and Mr. Hyde”), “Cold Harbor” is a tough, touching drama full of gritty, honest moments and dark, humorous situations. Writer-director Tom Brandau draws upon real-life events to craft this award-winning film about loss and family mythology and, ultimately, about burying the dead and getting on with life.

The film has screened at a dozen or so festivals across the country (including The Newport Beach Fest, the Ft. Meyers Beach Fest and the Fargo Fest and won Best Feature at the Annapolis Reel Cinema Fest and the Fox Film Fest. Brandau shot the film on the eastern shore of Maryland and Delaware.

MOORHEAD CAMPUS SCHOOL HISTORY FOCUS OF NEW BOOK, UPCOMING TALKS

Thousands of children passed through the doors of the Moorhead Campus School, eager students who reveled in the innovative and progressive teaching that occurred as part of the school’s mission as well as MSUM’s teacher education program.

But the Moorhead Campus School was much more than a training ground for future teachers. It shaped the lives of young people, future educators, the campus community, and educational researchers. Steve Grineski, MSUM professor of Education, is the author of a new book on the history of the Moorhead Campus School, "Baby Dragons: The Story of Moorhead's Campus School, 1888-1972."

Grineski

Grineski attended Bemidji State University, where he spent as

much time with his college-age peers as he did with elementary-age children in BSU's campus school. As an education student he witnessed and participated daily in the application of theories into practice at one of the country's many campus schools.

Campus schools, also known as training, laboratory or model schools, were designed to promote innovation, experimentation and research—all leading to better preparation of teachers and better education of students. Campus school students were afforded expansive academic opportunities not available at that time in public schools; the smaller enrollment allowed students to get involved in many activities; and students could take college-level courses while they were in high school.

The demise of campus schools occurred during the 1960s and 1970s because of several factors: greater breadth and depth of the public school curriculum; increased competition for educational funding; and conflicting goals of the campus schools.

By the mid 1950s, Moorhead Campus School enrollment peaked at 450 students in the K-12 program. The Moorhead Campus high school closed in 1971, followed by the elementary school closure in 1972. Today, about 200 campus schools exist worldwide.

The Book: "Baby Dragons: The Story of Moorhead's Campus School, 1888-1972," 200 pages, features more than 250 photographs and original documents and interviews with former students and teachers. It's \$15 and can be purchased at Zandbroz Variety and through the Web site www.mnstate.edu/babydragons. The book is supported through a grant from the National Association of Laboratory Schools with assistance from MSUM.

The Talks: "Looking Back & Looking Forward: The Story of Moorhead's Campus School"

* Thursday, April 12 at 6:30 p.m. at Zandbroz Variety

* Friday, April 13 from 11 a.m. to 1 p.m., Barnes & Noble, part of a Roundtable Buffet of Regional Authors.

* Tuesday, April 24 at 7 p.m., MSUM's Weld Hall Glasrud Auditorium. This talk includes a slide presentation showing photographs and original documents from the Moorhead Campus School.

Books will be available for purchase at these talks.

The Scholarship: For the past six years, Grineski has worked with students and teachers at the Red River Area Learning Center (RRALC), Moorhead School District's alternative high school. All proceeds from book sales will fund a scholarship for RRALC students to attend MSUM.

For more information, contact Steve Grineski, 477.2017 or visit www.mnstate.edu/babydragons

ALUM, ADJUNCT BRAD BACHMEIER WINS TOP NATIONAL CERAMICS AWARD

Brad Bachmeier, a 1993 MSUM alum and adjunct ceramics faculty member here, was selected as the winner of a 2007 NICHE Award for a piece entitled "Spirit Vessel I" in the Ceramics: wheel-throw category.

Bachmeier, the art department chair at Fargo North High School, accepted the award last week in Philadelphia.

The NICHE awards are referred to as the "Academy Awards of Fine Craft in the United States" by American Style magazine editor Wendy Rosen.

Bachmeier has received more than 20 national grant and best-of-show awards for his ceramic work and will be featured this spring on HGTV's "That's Clever" program.

Only 151 artists out of more than 1,000 entries were named as finalists for NICEH awards this year. Of that group, just 39 artists won awards in several categories including ceramics, wood, metal, jewelry and glass.

The awards are sponsored by NICHE magazine, the exclusive trade publication of North American retailers of American crafts.

HAGEN HALL REDEDICATION APRIL 13

Hagen Hall will be rededicated in a series of events on Friday, April 13. The campus community is invited to attend. Tour the remodeled laboratories, offices, and classrooms of the building from 1-3 p.m. A ribbon-cutting ceremony will be held at 3 p.m. in the SLB Atrium entrance to Hagen Hall, followed by a reception in Hagen 104 at 3:45 p.m.

The recent renovation of Hagen Hall is the culmination of an eight-year project to renovate the building and construct an adjoining science laboratory building. The first floor of Hagen Hall is home to the College of Social and Natural Sciences Dean's Office and the

Biosciences Department. It also features classrooms, a chemistry lab, and several technology labs. The second floor houses the Technology Department and several computer labs and classrooms. The third floor is home to the Physics and Astronomy Department and contains their labs and teaching spaces. On the fourth floor, faculty from the Biosciences and Chemistry Departments have their offices. The fourth floor also has several labs for Biosciences faculty.

The building is named for Dr. Olaf J. Hagen, a former resident director of Moorhead State College. Dr. Hagen practiced medicine and surgery in Moorhead, was a co-founder of the Fargo Clinic, was active in community affairs, and was for many years a member of the University of Minnesota Board of Regents and a resident director for Moorhead State College.

CHEMISTRY SEMINAR TUESDAY, APRIL 3 LOOKS AT NEW CANCER TREATMENT

Youngjae You, a professor in the department of Chemistry & Biochemistry at South Dakota State University, will present a Chemistry Department seminar on "Photodynamic Therapy, Treating Cancers with Low Energy Light, and the Roles of Chemists" from 5 to 6 p.m. Tuesday, April 3 in MSUM's Science Lab 118.

Photodynamic therapy (PDT) is a promising new treatment regimen for cancer based on multidisciplinary approach: chemistry, biology, and physics (optics). In PDT, three components are utilized to destroy a tumor: a photosensitizer, light (visible and near IR), and oxygen. A photosensitizer generates cytotoxic singlet oxygen following absorption of photons. Photofrin, the first photosensitizer, has gained regulatory approval as a photosensitizer in many countries, but it has several drawbacks including long-term skin phototoxicity, chemical complexity, and weak absorption at shorter wavelengths (~630 nm). Therefore, the development of more "ideal" photosensitizers is a major emphasis in research on PDT. The presentation will include 1) chemical ventures of design and synthesis of novel structures for the optimization of the structure and the study for structure-activity relationship (SAR), and 2) biological studies of sub-cellular localization and apoptotic cell death by the photodynamic treatment.

CRITICAL TIME IN THE LEGISLATURE

Now is the critical time for MSUM at the Minnesota Legislature. The House and Senate are developing budget targets for each area of the state budget, such as K-12 funding, higher education, social services and others. These budget targets will help set the stage for the final state budget and how much money the Minnesota State Colleges and Universities will receive.

Members of the Friends Action Network, a grassroots network of faculty, staff, students, community members and alumni who support the Minnesota State Colleges and Universities, are contacting legislators to urge them to support the system's biennial budget and capital requests. You can learn more and contact your legislators through the FAN network by going to www.fan.mnscu.edu.

The Minnesota State Colleges and Universities system is seeking funds to cover inflation, to make critical technology infrastructure improvements to benefit students and to strengthen the state's competitive edge with strategic advancements. In addition, the system is requesting repair, replacement and critical safety improvements funding for facilities throughout the system, as well as two property acquisitions. These projects were not funded from the 2006 capital request.

CAB PLANNING FOR FALL SEMESTER ACTIVITIES, EVENTS: SEEKING INPUT

CAB is a group of eight executive members and seven committees that serve as the student programming organization for MSUM.

The Campus Activities Board enhances the college experience through leadership, student development, and innovative programming that reflects and supports the diversity of the school as well as the surrounding community. The board also promotes activities to benefit the learning experience, which could be supplemental to many classes and areas of study across campus.

Programming for the fall semester has now started, and we are open to ideas and suggestions for activities, speakers and other unique programs from the faculty and staff. If you have any questions or suggestions please contact Becky Boyle Jones at boyle@mnstate.edu or 477-2524 or Nichole Eissingner at eissinni@mnstate.edu or 477-2264.
