TO: My SW460W Students
RE: Your thoughts!

This semester we developed our social work policy practice skills and competencies. We studied the history and systems impact of a social problem of our choosing. We pretended to be employed in an actual social work agency (also of our own choosing) as a licensed generalist practitioner working with clients who are experiencing our chosen social problem. We then explored three policy options, and chose one to developed into our own new human service program. We then examined strategies social work policy advocates use to advance their policy proposals to adoption. And we developed our technical writing ability in preparation for licensed social work practice. Please take a few minutes to express your thoughts about how SW460W has helped you grow in these areas. Your comments will not affect your grade, and will be strictly anonymous and confidential.

Thank you!
