  This project asks you to create binary trees that represent arithmetic operations. An example of such a tree is shown in the last panel of Figure 10 in the textbook.

(a) Draw the binary tree that would represent the calculation $(7x - 3)^3$.

(b) Draw the binary tree that would represent the calculation $\dfrac{3+4}{2-6} + 8$.

(c) Draw the binary tree that would represent the calculation $\dfrac{5\left((6+2) - 5\right)^3 + \left(4 - (6-8)^4\right)^2}{\left(4^2 - 9^2\right) + 8^3}$.

                          SHOW ALL WORK FOR CREDIT

  MSUM MISSION: *MSUM is a caring community promising all students the opportunity to discover their passions, the rigor to develop intellectually and the versatility to shape a changing world.*
