and show appropriate work. (Section 14.4A)

(Recommendation –make <u>sketches</u> on a separate sheet of paper of each bell-shaped distribution noting the given information)

## **14.4A Normal Distributions**

1.		table 14.16 to find the percentage of the data (area under the curve) that lie in the dard normal distribution.	following regions for a
	a) b	between $z = 0$ and $z = 1.84$ .	
	b) t	between $z = 1.34$ and $z = 1.62$ .	
	c) b	etween $z = -1.4$ and $z = 1.6$ .	
	d) t	o the left of $z = 1.4$ .	
	e) to	to the right of $z = 1.52$ .	
2.	Find	a $z$ -score such that	
	a) 40	0% of the area under the standard normal curve is above the z value.	
	b) 7	0% of the area under the standard normal curve is below the z value.	
	c) 5 <sup>o</sup>	% of the area under the standard normal curve is below the z value.	
3.		time a set of data has a normal distribution with a mean of 74 and a standard deviate tetermine the $z$ -score if the raw score $x$ is	ion of 6.
	i)	89 .	
	ii)	65	
	b) De	etermine the value of the raw score $x$ if the $z$ -score is	
	i)	-2.5	
	ii)	1.7	

4. Assume the weights of individual apples in a large collection of apples have mean of 9 ounces and a standard deviation of 2 ounces. What percentage of			
	a)	more than 9 ounces?	
	1 \		
	b)	between 9 and 11 ounces?	
	c)	more than 10 ounces?	
	d)	more than 7.6 ounces?	
	e)	between 7 and 8.6 ounces?	
5.	po	ssume that among the members at a men's gym, the distribution of body weights has unds and a standard deviation of 20 pounds. If 250 men are members of this gym, hould you expect to weigh more than 200 pounds?	
6.	bei	sume a certain tire manufacturer produces a new tire. Tests show that the number of fore blow-out has a normal distribution with mean 60,000 miles and standard deviated to the contract of th	
	a)	Should they warrant their tires for 60,000 miles? Why or why not?	
	b)	If they warrant their tires for 52,000 miles, what percentage of the tires would they while still under warranty?	expect to blow out
	c)	How many miles should they warrant their tires for, if they are willing to pay-off or	1 5% of their tires?
