JASPERSECHEM 341TEST 2VERSION 4Ch. 5 The Study of Chemical ReactionsCh. 9 StereochemistryCh. 9 StereochemistryCh. 10,11Alkyl Halides and their Reactions: Nucleophilic Substitution and Elimination

1. Draw the mechanism for the following reaction, and <u>write "slow" next to the rate-</u> <u>determining step.</u> Be sure to draw all intermediates, and to correctly draw "electronmovement" arrows or half-arrows. (Show the propagation steps only.) (4 points)

2. Draw the mechanism for the following reaction, and <u>write "slow" above the rate-</u> <u>determning step.</u> Be sure to draw all intermediates, and to correctly draw "electronmovement" arrows. (5 points)

 $\begin{array}{c} \overset{\text{Br}}{\swarrow} + \text{HOCH}_3 & \xrightarrow{\text{H}^+ (catalyst)} & \overset{\text{OCH}_3}{\longleftarrow} + \text{H-Br} \\ & \overset{\text{CH}_3\text{OH} (solvent)}{\text{heat}} \end{array}$ 

3. Predict the major products for the following reactions. (4 points each)

a) 
$$\longrightarrow$$
 Br + NaOCH<sub>3</sub>  $\xrightarrow{\text{CH}_3\text{OH} \text{ (solvent)}}$ 

b) 
$$\rightarrow$$
 + Br<sub>2</sub>  $\rightarrow$  hv

4. Draw the <u>substitution products</u> for the following reactions. (Do not draw the accompnaying elimination products). <u>Include stereochemistry in your answer, and if</u> two substitution products are formed draw them both. (4 points each)

$$H_{3C} + NaOH \xrightarrow{H_2O}$$

b) 
$$H_{3}C$$
  $CH_{3}$   $+ H_{2}O$   $H_{2}O$ 

5. Draw the <u>E2 elimination product(s)</u> [do not draw the substitution product(s)]. (4 points each)

$$\begin{array}{c}
\overset{H}{\overbrace{}} CH_{3} \\ H\\ Br \end{array}
\xrightarrow{} NaOCH_{3} \\ CH_{3}OH \\ H\\ H\\ H\end{array}$$

- 6. Of the following alkyl halides, (3 points)
- a) Circle the one that would be the most reactive toward  $S_N 2$  substitution
- b) Put a box around the one that would be the least reactive toward  $S_N 2$  substitution

- 7. Of the following alkyl halides, (3 points)
- c) Circle the one that would be the most reactive toward  $S_N 1$  substitution d) Put a box around the one that would be the least reactive toward  $S_N 1$  substitution

8. Rank the stability of the following carbocations, from 1 (most stable) to 4 (least stable) (4 pts)

9. Rank the stability of the following radicals, from 1 (most stable) to 4 (least stable) (4 pts)

10. Classify as R or S (2 pts each)

- 11. Provide the structure and the IUPAC name for the following (3 pts each)
- a) (R)-3-chloro-2-methylheptane

12. Classify the paris of molecules as <u>not isomers, structural isomers, diastereomers,</u> <u>enantiomers, or identical</u>, and circle any molecules that are <u>achiral</u>. (2 pts each)

- 13. For 1,2-dimethylcyclopentane,
- a) How many stereocenters are present
- b) Draw <u>all</u> the possible stereoisomers, and <u>circle those that are chiral</u>.

(8 pts)

Each of the following multiple choice problems is worth 3 points.

14. For the reaction shown below, with bond dissociation energies listed below each key bond, the overall  $\Delta H$  is:

$$(CH_3)_3C-H + Cl-Cl \rightarrow (CH_3)_3C-Cl + H-Cl$$
  

$$\Delta H \text{ (kcal/mol)} \qquad 91 \qquad 58 \qquad 78 \qquad 103$$

a) +58 kcal/mol
b) -32 kcal/mol
c) +32 kcal/mol
d) -57 kcal/mol
e) +181 kcal/mol

15. Which factor would <u>not</u> increase the rate of an E1 reaction:

- a) Use of a more polar solvent
- b) Use of a 3° rather than a 2° alkyl halide
- c) Doubling the concentration of the base
- d) Using iodide rather than bromide as leaving group
- 16. Consider the  $S_N^2$  reaction shown below. Assuming no other changes, what effect on the rate would simultaneously doubling the concentrations of both 1-bromobutane and KOH have?

 $CH_3CH_2CH_2CH_2Br + KOH \rightarrow CH_3CH_2CH_2CH_2OH + KBr$ 

- a) No effect
- b) It would double the rate
- c) It would triple the rate
- d) It would increase the rate by four times
- e) It would increase the rate six times

17. Of the  $S_N 1/S_N 2/E1/E2$  reactions, rearrangements are likely to occur in:

- a)  $S_N 1$  reactions only
- b)  $S_N 2$  reactions only
- c) E1 reactions only
- d) Both  $S_N 1$  and E1 reactions
- e) Both  $S_N 2$  and E2 reactions
