Optional: Molecular Models

- Available in the Varsity Mart (I think). \$23 as of 2013.
- Andruseducation.com sells a nice package with models and also 50 concept/reaction flash cards, for \$22 (as of May 2011) including shipping: <https://www.andruseducation.com/products.php>

Text and Materials For Chem 341/342 in Summer 2013 (see below for cheaper option):

- 1) Text: "Organic Chemistry", 8th edition, Carey and Giuliano
- 2) Solutions Manual: "'Student Solutions Manual to accompany Organic Chemistry" Eighth Edition, by N. T. Allison, R. M. Giuliano, R. C. Atkins, and F. A. Carey."
 - these are the standard organic books used in the NDSU organic chemistry courses beginning in Fall of 2010.
 - may be available as a bundle at the Varsity Mart
 - Amazon: http://www.amazon.com/s/ref=nb_sb_noss?url=search-alias%3Dstripbooks&field-keywords=Carey+Giuliano+Organic+Chemistry+8th+edition&x=0&y=0

Optional Alternative Textbooks (very cheap because they aren't current edition): Wade

- I appreciate how expensive the textbook and solutions manual are. The same topics I cover will be mostly covered adequately (sometimes better) in the organic chemistry textbooks authored by Wade 6 or 7 (the textbook that I use at MSUM).
