

GEOS 170 – Weather Log (Due April 30th)

- On a daily basis (preferably the same time each day) consult a weather page on the web (<http://www.weather.com/>, or <http://www.wunderground.com/>)
 - Construct a daily weather log for April 16 – April 30 (you may use Numbers, or Excel, or construct a chart by hand). **Record the following>**
 - Record actual high and low temps.
 - Relative humidity and pressure
 - Dew point
 - Wind chill/ feels like temp.
 - Wind direction and speed
 - Daily weather
 - consult a weather map daily - are we under the influence of a particular front or weather system?
- Trends -> explain them (why do these variables change and how do they influence the weather?)
