

Find studies about one concept or the other, the ones that have both need the most attention

General

I. Construct/Topic/Problem

Why is it important?
How is it designed?

Thesis: What will review cover and in what order?

Main topic #1: What is it? How has it been studied? What variables are known to influence it? What do we know? Unanswered questions (gaps in the literature).

Main topic #2: *same as above*

Sources that address both variables you're interested in

Briefly summarize review

Preview proposed method

Last roman numeral: Write out

hypothesis (prediction) in full sent.

These are the studies you will base your study on
